NEW

HIGH PERFORMING LUBRICATING GEL CONDAFORM BG 1636

With over 150 years experience in the lubricants industry, CONDAT constantly develops and improves its formulations. CONDAT's dedicated Tube product range covers the applications of hot and cold forming for tube and bar in the rolled, drawn, formed or extruded processes. The extensive product range is designed for all metals, carbon and stainless steel, aluminium, copper and alloys. It comprises of graphite coatings, non-reactive precoatings, soaps, reactive coatings, dry soap powders, soluble lubricants, neat oils, greases / pastes, surface protection products and degreasing products.

At the Boru (Istanbul) and Tube (Düsseldorf) shows, CONDAT will present a **new lubricating solution for the tube market:**

BENDING GEL : CONDAFORM BG 1636

Encouraged by the strong success with new customers, CONDAT launches this year its new **Bending Gel, CONDAFORM BG 1636**. This 100% soluble water based gel provides high lubricating properties and can be used on steel, stainless steel and aluminium tube forming (bending) applications. **CONDAFORM BG 1636** is also characterised by its excellent **cleaning ability** (water rinse is sufficient). **This lubricant is free of SVHC** (Substance of Very High Concern) **and VOC** (volatile organic compound). This odourless gel is **user-friendly** as its texture makes it easy to handle and clean.

Since its foundation in 1854, CONDAT has been internationally recognized as the specialist in lubricants. Using its depth of technical knowledge, CONDAT develops high performance lubricants with added value, adapted to every industrial application (wire drawing, forging, metal working, foundry, maintenance, heat treatment). CONDAT recommends to its customers the best lubricating solution, in terms of performance, economical and environmental constraints.
