

WIRE DRAWING LUBRICANTS NEWSLETTER

TECHNICAL INFORMATION AND NEWS FROM CONDAT

JULY 2009

ASSOCIATED MATERIALS

EDITORIAL

Dear customer,

Among its extensive range of products and lubricants, you may already know that CONDAT has developed a global logistic offer to meet your specific needs. Our equipment range is in constant evolution, and CONDAT can offer you materials such as : big bag delivery system with diaphragm vane, brush, applicator... to facilitate your day to day work and help you increase your productivity, reduce your lubricant consumption. We will continue to investigate any request that could lead us to bring you added value.

Alain Brunet
Equipment Manager

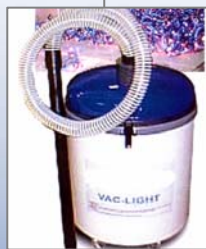

DOSATRON

When you use a soluble lubricant such as our **VICAFIL TCU** range and need to keep control of its concentration to regulate the supply, reduce consumption / costs, or maintain a stable and consistent bath, you can use an automatic mixing device such as **Dosatron**. Such equipment is available for 0 to 5%, 1 to 10%, 5 to 20%.

REMOVING GREASE

A new vacuum cleaner specially designed for removing greases from the die box has been added to our product range. The Vac Light 1000 is a small size portable vacuum, enabling easy access to wherever a powerful and light suction is required. It can then remove products such as our **VICAFIL TFH** or **TFG** products.

You can receive this Newsletter by email, log on at www.condat.fr, Actuality / Newsletters and fill up your email address

UNIMAX 2001

For in-line spraying protective oil lubricants onto a wire surface, before spooling, e.g. the **CONDAPROTECT** range.

Can also be used on in-line production of copper or aluminium rod wire to spray lubricant, improving corrosion resistance and sliding properties, thus avoiding scratches on the metal before spooling.

CONDABRUSH

CONDABRUSH range has received additional items such as:

- **CONDABRUSH B59 PPL** with polypropylene fibres to remove excess dry lubricant from soft metals.
- **CONDABRUSH B32** with stainless steel fibres especially designed for mechanical descaling system.

BIG BAG DELIVERY SYSTEM

A video has been developed to show you how to use the big bag delivery system and to help you visualise the concept and its advantages. The C.D is now available upon request. Two closing systems are available: guillotine or diaphragm. The video shows the diaphragm system, which is especially recommended for fine powders, and is the most secure option.
