

Condat Wins Platinum Medal on EcoVadis CSR

Condat, international specialist in industrial lubricants for more than 165 years, has obtained the "Platinum" level recognition on the EcoVadis Corporate Social Responsibility (CSR) platform. With this result, Condat is now part of the TOP 1% of the best rated companies in the world by EcoVadis.

Initiated several decades ago, Condat's responsible commitment is based on one of the Group's core values: Build To Last. Guided by this historical value, the company has been pursuing a long-term strategy since 1854 that contributes greatly to its longevity. Condat is thus one of the precursors of the development of industrial lubricants with reduced environmental impact, and launched more than 20 years ago its first biodegradable lubricants. Anchored in strong human values, the family group is structured around an assertive social policy.

In 2018, Condat went further in its CSR approach by joining the international EcoVadis platform. Its CSR performance is evaluated each year by an independent body according to 21 criteria divided into four themes: Environment, HR and Human Rights, Business Ethics and Responsible Purchasing. These CSR assessments are based on authentic evidence and are internationally recognized. Initially silver, Condat progresses until obtaining in October 2021 the Platinum level, the highest distinction awarded by EcoVadis.

The company's objective is to reduce its ecological footprint and guide its organization towards sustainable value creation that takes into account social and environmental issues. It integrates, among other things, the Sustainable Development Goals at each stage of the life of its products, as evidenced by its unique system of self-evaluation of its eco-designed offer: the Lubriscore®. Condat also wants to influence its entire

value chain, and relies on a collective of women and men involved to support customers and partners towards responsible performance, in a spirit of co-development.

The Platinum medal was awarded by EcoVadis to all the subsidiaries of the Condat Group. Indeed, if the group exists since 1854 in France, it has gradually developed internationally to favor customer proximity, with locations in the United States, China and Brazil. The group then diversified into the Health-Beauty market, through laboratories specializing in the manufacture and distribution of organic and natural products, which today offer different ranges of cosmetic products. www.condat.fr

Megan Lovitt to Director of HR at Cleaning Technologies

Megan Lovitt has joined Cleaning Technologies Group, LLC (CTG), Cincinnati, OH, USA, as the Director of Human Resources effective November 2021.
