

PRODUCT SHOWCASE

FUTEC Hall 15 A-13

Founded in 1977 in Japan, FUTEC is a pioneer of automatic flaw detection systems for print and surface inspection. FUTEC Europe will demonstrate an optoelectronic 100% online wire and cable surface inspection system using only one CCD line scan camera. The system is foreseen for outer diameters from 0.5 to 60 mm and can be easily integrated into existing production lines without having to modify them. When a wire or cable passes through, the system captures small surface defects and contaminations, registers their size, shape, position and number and displays these defects simultaneously on a screen. The line operator recognizes when tolerance limits are exceeded and can take corrective actions in the production process. futeceurope.com.

COM-tec GmbH
Germany Hall 15 J-47

We have designed our environmentally friendly drum dispenser—the POWERTWISTER—especially for you. With minimal effort you can use drums with cables, pipes, ropes, chains, hoses or wires. The POWERTWISTER is extremely robust, durable and can be used individually. Rolling it off the drum is child's play. You can also store it to save space. You can use the POWERTWISTER quickly and conveniently. As a loyal companion, it is easy to use and saves you time and personnel costs when drumming. Likewise expensive storage costs after use. The damage to the drum goods that is known in practice and is caused by forks, etc., is completely avoided. comtecgmbh.de.

Cometo Srl
Italy Hall 9 C-54

Cometo offers an extensive product line of feeders, rotating dies, traversing units, wire straighteners, wire guides and rollers. Cometo wire-handling equipment can meet the most critical demand of wire straightening, guiding and feeding requirements. cometo-italy.com.

Condat
France/USA Hall 10 A-56

2024 marks the 170th anniversary of Condat Group! Backed up by proven technical and commercial expertise since 1854, the company offers a large range of lubricants adapted to its clients' wire drawing processes, such as extensive selection of soaps, surface treatments, neat and soluble oils. Renowned as world reference in this field, we offer the most comprehensive range of zero borax products, aligning seamlessly with our CSR strategy, which has achieved Platinum certification by ECOVADIS. With professionalism, we support and advise you on the best solution for optimum results, taking into account environmental, safety and social issues. condatcorp.com. condat-lubricants.com.

Conoptica AS
Norway Hall 9 C-39

Since 1995, Conoptica has offered high-accuracy systems for drawing die measurement. Come and see our advanced measurement systems: CU6S, CU20 and CU11S. Measure round dies fast and efficiently. Advanced bearing symmetry analysis. Detailed shaped dies measurement. Measure drawing dies with diameters from 0.00079 to 2.126 in. (0.020 to 54.00 mm). conoptica.com.

Coremo Ocmea SpA
Italy Hall 11 D-69

Coremo Ocmea has been manufacturing industrial brakes and clutches since 1960. Precise design and high-quality components, combined with continuous innovation, make our brakes and clutches. coremo.com.

DDEV Plastiks Industries Ltd.
India Hall 10 F-52

Kkalpana Industries (India) Limited is a leading manufacturer of various compounds catering to the power and cable industry. A full range of products is offered for cables, including PVC and low, medium and high voltage. ddevgroup.com.

Domeks Makine Ltd. Sti.
Turkey Hal 10 A-60

Automated coiling/spooling lines for single and multi-conductor wires, and multi-purpose compounding lines. domeks.makine.com.

Eder Engineering
Austria Hall 10 C-42-01

Eder Engineering will offer a variety of latest technological developments in drawing die-tool working machines that benefit users by providing longer die life, more tonnage drawn, accurate die reconditioning and lower operational costs. It was display the following models: the ETC-1/HF, an

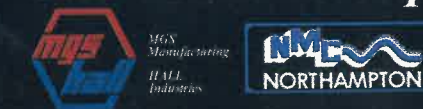

WE ARE IN THE BUSINESS OF SOLVING PROBLEMS

WIRE, CABLE, OPTICAL FIBER, HANDLING AND TWISTING EQUIPMENT

The MGS Group – Northampton Machinery Company
 100+ years of leadership in rotational equipment for the wire and cable industry.
 We continue the company tradition of building the most rugged, robust,
 and reliable double twist technology. MADE IN THE USA!
 Backed by world-class service and support to provide decades of performance.
